## WHY CLIENTS CHOOSE COMPANY

### Trading Tools

Definite Area's wide range of trading instruments provides every opportunity to grow your profits. The most modern trading technologies and services for clients with any amount of capital are at your disposal. We create an optimal investment portfolio for each client. With the help of our tools, you will get all the opportunities to achieve your financial goals.

### Accounts and financial plans

For each client, we provide optimal account features and a personal financial plan to achieve goals. When developing your financial plan, we take into account age, experience, target skills, and financial situation. As a result, you get a comprehensive strategy for increasing capital and all the necessary tools for making money on trading.

### Expert Assistance

A team of Definite Area experts will be your guides in achieving financial goals. Our specialists assess market conditions to keep up with any changes and offer you the best trading experience. We provide all the necessary practical advice, assistance, supervision, and training from the best traders. Also, you can contact your personal manager for help at any time.

### Training Opportunities

Our training programs are designed for clients with different levels of knowledge and experience. Programs are developed by professional and experienced traders. With the help of our full-time experts, you will improve your skills and start making money on trading in a short time. To join the training, you need to register in the Definite Area system.

### Customer and Technical support

Simple and convenient interaction with the platform will be provided by our team of technical and customer support. You can contact the help center at any time and get a quick solution to any issue. A personal manager is always in touch with you: you can receive instant answers by phone, live chat or e-mail. Our main priority is the comfort of each client.

### Safety

We monitor the security of each transaction by offering advanced settings for tracking account activity. The use of Secure Socket Layer technology maintains confidentiality of your transaction history, payment information and other personal data. Safety technologies are constantly reviewed and updated by company experts to maintain the highest level of security for our clients.
